

# Specifications

|                                     |                |                                             |               |
|-------------------------------------|----------------|---------------------------------------------|---------------|
| Cooling capacity                    | 3,500 W        | Hose length                                 | 1,5 m         |
| Heating capacity                    | 2,900 W        | WiFi                                        | Yes           |
| Power consumption in cooling mode   | 1,120 W        | Cooling media                               | R290/250g     |
| Power consumption in heating mode   | 960 W          | Sound level in cooling mode (LWA) (dB(A))   | 60–64 dB      |
| Power consumption in AirSwitch mode | 32 W           | Sound level in cooling mode (LPA) (dB(A))   | 49–52 dB      |
| Air flow                            | 220–320 (m³/h) | Sound level in AirSwitch mode (LWA) (dB(A)) | 49,5–51 dB    |
| Energy class                        | A+             | Sound level in AirSwitch mode (LPA) (dB(A)) | 35–38 dB      |
| Dehumidification capacity           | 33.6 L / 24 h  | Weight                                      | 31 kg         |
| Temperature setting                 | 17–30°C        | Unit dimensions (H×W×D)                     | 850×471×400mm |
| Working temperature                 | 5–43°C         |                                             |               |
| EER in cooling mode                 | 3,1            |                                             |               |
| EER in AirSwitch mode               | 8              |                                             |               |
